ABOUT US

Established as an independent international inspection company, General Survey Inspection Co., has established its reputation through its commitment to maintaining the interests of its clients in a highly competitive market structure. We are proud to be a superintendent member of both GAFTA (The Grain and Feed Trade Association) and FOSFA (Federation of Oils, Seeds and Fats Associations). Our association with these distinguished global trade organizations empowers us to maintain and uphold the highest standards of service in the inspection industry.

Our core principles – reliability, efficiency, and confidentiality – guide our service ethos. We strive to meet our clients' diverse requirements and exceed their expectations while achieving our pre-set goals in a timely manner. Client satisfaction is not just a target, but a commitment that steers our development strategy and service delivery process.

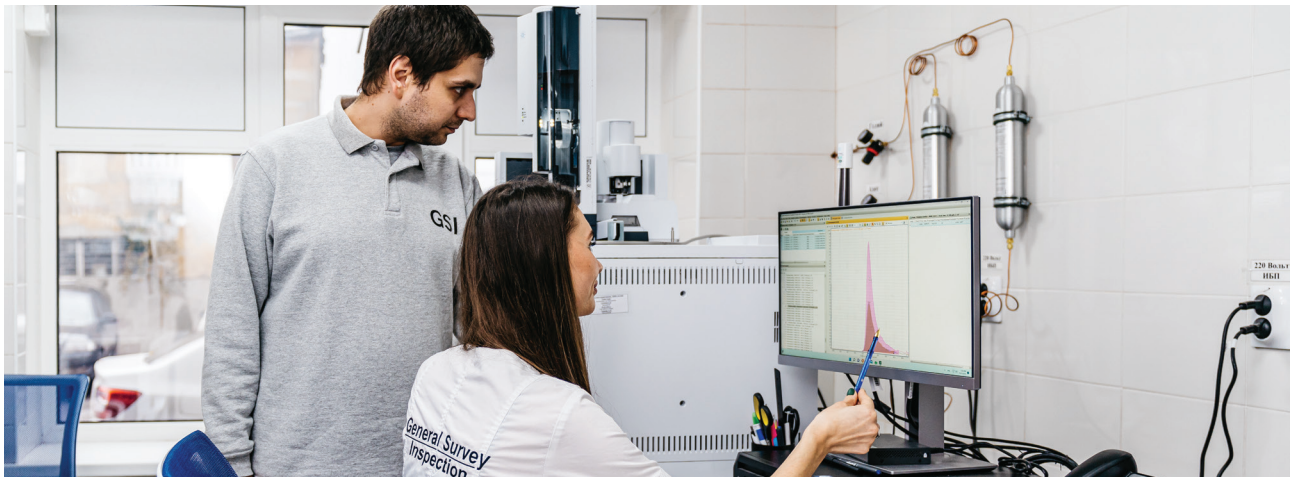

A testimony to our commitment towards exceptional service delivery is our adherence to National and International Quality Management Standards. We are certified by ISO 9001, and are a recognized service provider under TUV NORD. Furthermore, General Survey Gozetme has earned accreditation from TURKAK according to ISO 17020, underlining our commitment to maintaining rigorous inspection standards and quality control.

As a superintendent member of GAFTA and FOSFA, we take on a crucial role in ensuring the quality and safety of grain, feed, oils, seeds, and fats traded internationally. Our membership and active participation in these associations reflects our dedication to quality assurance and our commitment to promoting fair trade practices.

At General Survey Inspection Co., Ltd., we understand the nuances of the global trade industry, and strive to deliver services that not only meet, but exceed the industry standards. Our years of experience and consistent commitment to excellence have positioned us as a trusted partner for businesses across the globe.

In the journey ahead, we promise to maintain our service quality, uphold our founding principles, and continue safeguarding our clients' interests. Together, let's shape a more reliable and efficient global trade industry.

We serve our clients with our highly educated, specialized and qualified staff that have required know-how for maintaining customer satisfaction and also for carrying out important and professional inspections; in our offices and accredited laboratories located in Türkiye (GAFTA, FOSFA, ISO 17020),Romania (GAFTA, FOSFA, ISO 17025), Ukraine (GAFTA, FOSFA) and Kazakhstan (GAFTA, FOSFA, ISO 17025, ISO 17020) and Uzbekistan.

Grain, Agricultural Products, and Oilseeds Inspection
Understanding Quality Standards: We help our clients understand and meet the international quality standards set by bodies like GAFTA and FOSFA. Adherence to these standards ensures that the grains, agricultural products, and oilseeds meet the safety and quality requirements for international trade.

Detailed Inspection Process: Our inspection process includes examining the product's condition, weight, packing, marking, and quality attributes such as moisture content, purity, and harmful residue levels. This thorough inspection helps identify any issues that could affect the product's quality or safety.

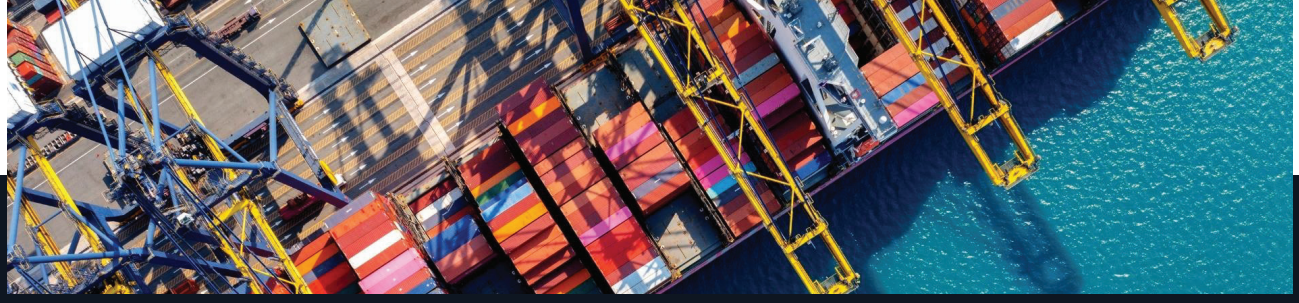

Timely Reporting: Post-inspection, we provide a detailed report, capturing all aspects of our findings. This helps our clients take the necessary actions, ensuring the product's compliance with the required standards.

Risk Mitigation: Our inspection services act as a safeguard, minimizing the risk associated with trading grains, agricultural products, and oilseeds. We aim to protect your interests and ensure smooth transactions in your trading processes.

Expert Guidance: In case of discrepancies or quality issues, our team of experts will provide guidance on corrective actions and preventive measures. This ensures that your products align with global best practices and standards.

Continuous Monitoring: We also offer services for continuous monitoring of storage conditions, handling, and transportation. This helps in maintaining the product's quality throughout the supply chain, from the point of origin to the point of delivery.

Our role extends beyond mere inspection; we act as a trusted partner, dedicated to upholding the quality and safety of your grain, agricultural products, and oilseeds. As you navigate the complex landscape of international trade, you can rely on General Survey Inspection Co., Ltd. for dependable, comprehensive, and professional inspection services.

01 Weight Supervision

Irrespective of the mode of transport - whether by truck, wagon, or conveyor belt - we ensure effective weight monitoring at both loading and discharge ports.
Our goal is to protect your interests through:

Verification of scale calibration to minimize cargo loss.
Precision weight determination using the Draft Survey method on vessels.
Employing dedicated teams during vessel discharge
to ensure accurate weight recording and Draft Surveying.

02 Quality Supervision

In line with our clients' instructions, we conduct quality control checks during both
loading and discharging activities, following international and individual contracts.
In this process, we abide by GAFTA/FOSFA rules in sampling and implement
measures to preempt possible issues:

Providing daily informative briefings to our clients to ensure transparency.
Utilizing our internationally accredited, fully equipped laboratories in Turkey, Romania, Ukraine, Kazakhstan, staffed by expert professionals.

03 Sampling

Recognizing the critical role of sampling in quality control, we adhere to the highest professional standards. We bring years of experience and deep product
knowledge to ensure accurate sampling as per international standards and contracts.
All analyses are performed on representative final samples to prevent any discrepancies
between the parties.

04 Pre-Loading Supervision

Understanding the value of pre-loading checks, we assess
the quality and condition of goods before loading.
We take samples from the storage sites in accordance with standards,
conduct analyses, and report the findings to our clients,
ensuring they are well-informed about the product's status before it's loaded.

05 Cleanliness Supervision

To protect agricultural bulk products from insect infestation and odors, we conduct rigorous cleanliness inspections of warehouses before stockpiling and check the empty holds, tanks, trucks, and containers for cleanliness and suitability for loading. This safeguards the quality of your goods and ensures they are stored and transported in a clean and suitable environment.

At General Survey Inspection Co., Ltd., we understand the complexity of international trade and offer a suite of services tailored to meet the diverse needs of our clients. Our commitment to reliability, efficiency, and confidentiality ensures a high-quality inspection process that you can trust. Let us guide you through the complexities of the global trade industry with our comprehensive and professional inspection services.

06 Fumigation

A vital part of preserving the quality of agricultural products during storage or transportation is effective fumigation. This process eliminates live insects, thereby preventing potential infestation and resultant damage.

At General Survey Inspection Co., Ltd., we offer professional fumigation services tailored to the climate and environmental conditions of your stored product. Whether it's in warehouses, silos, ship holds, or containers, our team ensures that the right amount of the appropriate fumigant is used for each job.

Our fumigation services aim to ensure the longevity and preservation of your bulk and bagged agricultural products. We understand the potential risks posed by infestations and use our knowledge and expertise to mitigate these risks, ensuring your goods remain in prime condition during storage and transportation.

With our meticulous approach and commitment to excellence, we ensure the safe, efficient, and effective fumigation of your agricultural products. Trust General Survey Inspection Co., Ltd. to help protect your products and maintain their quality throughout the supply chain.

07 Laboratory Services

General Survey Inspection Co., Ltd. is proud to offer a comprehensive suite of laboratory services that support our quality control processes. Our laboratories are accredited by GAFTA and FOSFA, specializing in the analysis of cereals, pulses, animal feeds, and oilseeds.

Upon receiving your analysis requests, our specialists will prepare the best alternatives and provide quotations for your company. To maintain our high standards of service, our laboratories are always open to feedback and information from your side. Moreover, if needed, we can expedite your analysis needs by collaborating with third-party laboratories that hold international accreditations.

In addition to basic physical and chemical analyses, we provide a broad range of specialized testing services to ensure your products meet the necessary safety and quality standards:

GMO Analysis: We perform GMO testing to detect genetically modified organisms in your products, ensuring compliance with international regulations.

Dioxin Analysis: Our laboratory conducts dioxin tests to monitor these environmental pollutants in your goods and protect your brand reputation.

Mycotoxin Analysis: Our team is proficient in testing for mycotoxins, toxic substances produced by certain fungi, ensuring your products are safe for consumption.

Melamine Analysis: We offer melamine testing to ensure this chemical compound, potentially harmful if consumed in large quantities, is within acceptable limits in your products.

Microbiological Analysis: Our microbiological testing services verify the microbial content in your products, providing essential data for assessing product safety and quality.

Vitamin, Mineral, Additive, Heavy Metal Analysis: Our experts conduct a detailed examination of your products for vitamin, mineral, additive, and heavy metal content. This provides comprehensive insights into the nutritional value and safety of your goods.

Pesticide Analysis: We perform pesticide residue analysis to ensure your products are free from harmful chemical residues, adhering to safety and quality standards.

Other Services

We offer a variety of specialized services in addition to our core offerings, tailored to accommodate a range of client needs:

- **In Situ Classification**:

  Our experts are available to provide personnel and reporting services for classification, stocking, forwarding, and loading operations during harvesting periods and buying operations. These services are designed to maintain the utmost organization and efficiency during these critical stages of your operations.

- **Collateral Management**:

  Our collateral management services are designed to secure and monitor the product offered as collateral under a loan agreement between the cargo owner and the financier. As the appointed collateral manager, we maintain the product in storage, ensuring its safety and security. We can provide these services for a wide array of commodities, including agricultural and industrial products.

- **Guarantee Business Solution**:

  We offer a service that covers weight and quality discrepancies detected between the loading and discharging of a shipment. This service includes:

  Full Outturn Guarantee Weight (FOG): Under an outturn guarantee, we may assume responsibilities for any weight differences in accordance with the custom of the port and/or the terms of your contract. This assures you that your cargo will be accounted for in its entirety.

  Full Outturn Quality (FOQ): Similarly, under an outturn guarantee, we may assume responsibilities for any quality differences detected between the port of loading and the port of discharge. This ensures that the quality of your product remains consistent and within the agreed parameters.

  By offering these additional services, General Survey Inspection Co., Ltd. further demonstrates its commitment to comprehensive, client-focused support. Our goal is to provide a one-stop solution for your needs, making us your ideal partner in the global trade industry. Let us leverage our resources, expertise, and dedication to service to assist you in achieving your business objectives.

Why Choose General Survey Inspection Co.?

At General Survey Inspection Co., Ltd., we leverage over 25 years of grounded experience to provide exceptional consultancy and inspection services to our clients. Our seasoned professionals are well-equipped to offer the best technical consultancy for your specific needs, contributing to the efficiency, safety, and success of your operations.

Unparalleled Expertise:
Our longevity in the industry and wealth of experience allow us to give valuable insights and recommendations. We understand the nuances of the trade, the complexities of product quality and safety, and the importance of risk mitigation. Our experts can guide you through various processes, offering advice and recommendations on a wide range of supportive fields.

Round-the-Clock Availability:
We understand that the global trade industry never sleeps, and so do we. Our professional services are available to you 24/7, ensuring uninterrupted support and guidance whenever you need it. We're here to help you overcome any challenges and make the most of every opportunity that comes your way.

Risk Management:
Our professionals can identify potential risks in your operations and offer strategic solutions to mitigate them. This can lead to substantial improvements in work efficiency and reduce the likelihood of encountering operational issues or setbacks.

Client-Centric Approach:
Your satisfaction is our top priority. We value our relationships with our clients and strive to provide services that meet your unique needs and exceed your expectations.

Choosing General Survey Inspection Co., Ltd. means choosing reliability, expertise, and superior service quality. With us, you're not just getting an inspection company; you're gaining a partner dedicated to supporting your business every step of the way. Let's work together to ensure your operations thrive in the competitive global trade industry.

AGRICULTURAL INSPECTION

Inspection and Examination of Oils, Seeds, and Feed Products

At General Survey Inspection Co., Ltd., we offer meticulous inspection and thorough testing services for a wide variety of vegetable oils, oilseeds, and related feed by-products, including but not limited to soybean meal and palm oil.

Our team of certified analysts is adept at conducting comprehensive tests on all necessary physical and chemical parameters, such as moisture, fibre, protein, free fatty acids (FFA), E.coli, and damaged seeds, among others. These tests are executed in strict compliance with globally recognized industry standards, including those set forth by bodies like FOSFA and ISO.

We are equipped to examine an extensive array of vegetable oils and seeds, including soybeans, sunflower seeds, rapeseed, and more. Our robust testing and inspection services are designed to provide you with the assurance of product quality, safety, and compliance.

Full-Spectrum Cereal and Grain Inspection and Testing Services

We provide a comprehensive suite of inspection and testing services to ensure absolute traceability of your grain and cereal consignments throughout the entirety of the supply chain.

Our dedicated team of seasoned inspectors and analysts offer tailor-made services for a broad spectrum of cereals and grains, including but not limited to wheat, corn, barley, rice, and sorghum, right from the farm to the port.

We aim to mitigate risks associated with potential delays, damage, and losses to your cereal shipments. Our versatile range of services encompass:

Inspection Services:
We offer a plethora of inspection services during shipment and at port, including but not limited to:

Sampling and Analysis: In line with industry methodologies and specifications (e.g., GAFTA), we conduct thorough sampling and analysis.

On-Site Grading and Weighing: Our team performs accurate grading and weighing on-site, ensuring precise quantity and quality metrics.

Loading and Discharge Supervision: We oversee the entire process of loading and discharge, ensuring it proceeds smoothly and correctly.

Vessel Hatches and Holds Inspection: Our inspectors meticulously assess vessel hatches and holds, ensuring they are suitable for your shipment.

Draft Surveys: We carry out draft surveys to verify the weight of your cargo, ensuring accurate documentation.

Stock and Fumigation Monitoring: We oversee the storage of your cereals and grains and monitor fumigation processes to maintain optimal quality and safety.

Rely on the expertise of General Survey Inspection Co., Ltd. to safeguard your cereal and grain shipments, ensuring they reach their destination in the best possible condition.

Inspection and Analysis of Pulses

At General Survey Inspection Co., Ltd., we provide an extensive suite of inspection and testing services encompassing all varieties of pulses such as chickpeas, lentils, and dry beans.

From the field to the port, our aim is to help clients mitigate potential shortages and quality issues, and enhance traceability throughout the pulse transaction process. Our primary objective is to protect our client's interests by confirming shipment compliance with agreed contract specifications or prevailing industry standards.

We operate in crucial markets globally, offering a vast array of customized services for shipments at every point in the supply chain. Our comprehensive services include:

Inspection Services:
Our suite of inspection services during shipment and at the port comprise:

Sampling and Analysis: Conducting thorough sampling and analysis in accordance with industry methodologies and specifications (e.g., GAFTA).

On-Site Grading and Weighing: Performing precise on-site grading and weighing of pulses.

Loading and Discharge Supervision: Overseeing the complete loading and discharge process to ensure compliance with standards.

Vessel Hatches and Holds Inspection: Conducting detailed inspections of vessel hatches and holds.

Draft Surveys: Performing draft surveys to ensure accurate weight documentation of your shipment.

Stock and Fumigation Monitoring: Overseeing stock storage and monitoring fumigation procedures for optimal pulse safety and quality.

Testing Services:
We offer a comprehensive set of testing and analysis services as per international standards, including:

On-Spot and Physical Testing: Performing on-the-spot and physical tests to verify the quality of the pulses.

GMO Testing: Conducting tests to check for genetically modified organisms.

Chemical, Contaminant, and Microbiological Analyses: Performing comprehensive chemical, contaminant, and microbiological analyses to ensure safety and compliance.

With General Survey Inspection Co., Ltd., you can be assured of quality, safety, and compliance throughout your pulse supply chain

Fertilizer Inspection and Testing

General Survey Inspection Co., Ltd. offers comprehensive inspection and testing services designed to ascertain the quality and quantity of your fertilizers at the production site, storage facilities, and at port.

We provide specialized inspection and testing services that encompass both dry and liquid mineral fertilizers, in bulk or bagged form. This includes a wide variety of fertilizers, such as nitrogen, phosphate, potash, sulphur, kieserite, and compound fertilizers.

As an active player in key markets, we collaborate with our clients at every stage of the supply chain, from production site to port. As a member of the International Fertilizer Industry Association (IFA), our commitment is to foster a secure and confident trading environment for clients across the globe.

We cover a range of products, including:

Nitrogen-based fertilizers (such as Ammonium Sulfate (AS), Ammonium Nitrate (AN), and granulated/prilled Urea)
Phosphate-based fertilizers (such as Diammonium Phosphate (DAP), Monoammonium Phosphate (MAP), Triple Super Phosphate (TSP), Single Super Phosphate (SSP), and rock phosphate)
Potash-based fertilizers (such as Muriate of Potash (MOP), Sulfate of Potash (SOP), Nitrate of Potash (NOP))
Compound fertilizers (such as Nitrogen-Phosphorus-Potassium (NPK), Nitrogen-Phosphorus-Sulfur (NPS))
Others (including Sulphur, Kieserite, etc.)
With General Survey Inspection Co., Ltd., ensure the quality and quantity of your fertilizer products at every step of the supply chain
